Art no: 271030001

Uni Easy Transfer Mattress

## BENEFITS

# UNI EASY TRANSFER MATTRESS

Made to correspondent to EN 1789  
MDR 2017/745 Class 1 Medical device

The Uni Easy Transfer mattress has been designed to fit most common stretchers available on the market.

High level of patient comfort due to the V-shaped foam plus the Sensus memory foam.

To give extra comfort the PVC fabric is made from a soft and comfortable material, yet it is durable for long and hard use.

5 handles on each side, allow paramedics to easy lift, carry and slide the mattress with patient on it.

For easier patient access during transport the handle part can be folded under the mattress on the stretcher.

Sliding surface on the reverse of fiberglass material, reducing friction and allow sliding of the mattress e.g. on the floor/ground or from stretcher to stretcher or from stretcher to hospital bed.

It is very easy to apply the stretcher's restraint system due to the easy access slits at the shoulder level on the Uni Easy Transfer mattress.

For patient safety the mattress should be secured on the stretcher with the stretcher's restraint system.

It is hygienic as it is fully welded and easy to clean with most common disinfectants.
